

LATINA PHARMA SpA SHE POLICY

Latina Pharma SpA manufactures pharmaceutical products to offer its customers competitive, reliable solutions in order to improve the patient's quality of life. The Company works in partnership with major pharmaceutical companies and leading world reference ones.

Moreover, *Latina Pharma SpA*, carries out solvent recovery activities from wastewater of external origin to the site, through a distillation process, in order to give a "new life" to solvents that would otherwise have to be disposed of: in this way it increases the circular economy model, the development model of the United Nations 2030 Agenda for Sustainable Development, present in the Paris Agreement on Climate Change.

Latina Pharma SpA considers Environmental, Health and Safety safeguard as essential values in performing its own manufacturing operations and development activities, in order to assure its employees and the surrounding community social welfare.

Commitment of the Top Management fits into this framework to adopt and maintain an Integrated Management System (SGI) for the Environment, Health and Safety - in compliance with the UNIEN ISO 14001: 2015 standard and UNI EN ISO 45001:2023 to be suitable for the purposes and context of the organization, including the nature, size, environmental impacts, identified in relation to their activities, products and services.

Finally, *Latina Pharma SpA* has adopted the organization, management and control model pursuant to Legislative Decree 231/2001 and subsequent amendments *Latina Pharma*, to highlight its policies of conduct, setting the values of ethics and respect for the law, with the ultimate goal of preventing and containing the risks of crime.

Through the adoption of the Integrated Management System, the Top Management intends to guarantee the prevention of pollution, control and minimization of risks, seeking the continuous improvement of its performance in the environment, health and safety in conformity with the compliance obligations imposed by legislation and those signed by the organization.

The commitment of the Top Management is aimed in particular at:

- a. Safeguard** the company's employees, external personnel and visitors' Health and Safety, preventing accidents at work and occupational diseases through the risk assessment procedure and the adoption of efficient collective and organizational preventive techniques, in order to eliminate the problem- where it is possible- or reduce it;
- b. Prevent** Accident, minimizing the risks connected with the probability of an event occurring and the use of hazardous substances, through the reduction in the use of these kind of substances and/or their substitution, employing the best technologies available in each of these stages, in accordance with the corporate sustainability;
- c. Prevent** pollution and reduce the significant environmental impact caused by the plant own operations, such as the energy and water consumption - atmospheric emissions - waste generation, water discharge and smells during ordinary, anomalous or emergency situations, through a continuous process assessment, pursuing improvement objectives, through a continuous evaluation of its own processes in a life cycle perspective;

LP Latina Pharma SpA

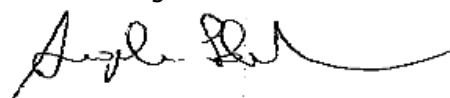

- d. Observe** the compliance obligations both in force and future ones, concerning Environment, Health and Safety as well as all commitments subscribed on voluntary basis;
- e. Guarantee** the performance of accurate assessments as concerns Environment, Health and Safety, regarding the decisions which affects all changes and developments of the plant operations;
- f. Establish and pursue** improvement objectives, including the introduction of economically sustainable technological innovations, promoting at the same time a program of rational use of the site's energy and natural resources, making available the resources and skills necessary to achieve the annual and all-year goals implementation of the preset plans;
- g. Inform, educate and train** all personnel working in the plant, including visitors, employees and contractors, to ensure that they are aware of their own responsibilities and able to work observing the Italian legislation, the assigned instructions, the current policy and the corporate regulations;
- h. Ensure** consultation and participation of workers and their representatives;
- i. Maintain** mutual trust and confidence with the Authorities, a continuous cooperation with the Institutions and an open and productive dialogue with the local communities, in order to promote both the plant and the surrounding areas;
- j. Implement** an adequate control over all activities / products / services that have a significant impact on the environment and that present or may present risks to health and safety, through the preparation and implementation of adequate procedures and instructions;
- k. Develop and finalize** emergency plans containing measures and procedures which are necessary to face accidents or emergency situations and to limit the effects;
- l. Adopt** a control and monitoring system in order to analyze systematically the Management Systems performances and provide the essential elements to support the continuous improvement program;
- m. Act promptly** to correct or prevent situations of non-compliance, accidents, near misses, and any other event which differs from the operation's ordinary performance;
- n. Review**, on annual basis, the state of implementation of the plans preset for the achievement of the established objectives of improvement regarding Environment, Health and Safety

This **Policy** is:

- ✓ Displayed on the plant bulletin boards and published on the corporate intranet portal;
- ✓ Shared with all the stakeholder through the Latina Pharma's official website;
- ✓ Delivered to Suppliers and Contractors.
